Description:

LED candle & tube firework bulb series include many styles, these bulbs are all inspired by historical squirrel caged design. These bulbs from this series mimic the style of class Edison lamp, but using modern LED in place of growing metal filaments. LED light source use 80% less power than traditional incandescent or halogen lights and 50% less than compact fluorescent. Meanwhile, LED lights will generate less heat in the process of running and thus can reduce the fire risk caused by Overheating the ceiling. Led candle & tube fireworks bulbs series can be used on anywhere you want, they perfectly creates a mixtures of vintage and modern styles at your home. Led lights have a much longer serves time than conventional lights. From what we have mentioned above, the Led firework bulb will be the best choose if you want to decorate your house unique.

LED Candle & Tube Fireworks Bulb Features:

1. Led lighting source, it will use 80% less power than traditional light.
2. Long life span, it can last over 25000hours.
3. Environment-friendly, without mercury and any other harmful healthy metal.
4. Less heat generate and more efficient.
5. This series has many styles can be choose, their shape is different.(the detail specification of each product ,please refer to the attached product manual)
