

Zhejiang Seming Electronic Co., Ltd

 	Name: T8 Led Tube Light	
	Model: /	
	LED QTY: /	
	Size: D: L:1200mm	
	Weight: /	
	Certificate:CE,RoHS,FCC	
		

Specification

Actual Power	18W	Size	L:1200mm
Lumens	120	Output Current	/
Output Voltage	/	LED Quantity	/
Lifespan	30,000 Hours	Commercial Type	T8
Working Frequency	/	CCT	warm light 3000K, cold light 5700K
Weight	/	Coverage area	/
LM/W	80/100	Material	high-quality PC

Description:

T8 LED tube light is probably the most extensively used lighting products in the modern world. The T8 LED tube light is designed to replace traditional T8/T12 medium bi-pin Base fluorescent tube lighting to reduce energy and maintenance costs while improving the quality of light in work environments and living spaces. Compared to traditional light sources, led tube have many advantages, such as led tube is not used fragile material for its tube shaped shell and doesn't have mercury vapor filled in the shells, so it is safer than fluorescent tubes. At the same time, LED tube is energy-saving, it uses 90% less energy than fluorescent tubes, there is no warm up time with these LED tubes, the moment you turn the lights on the tube will light up immediately. LEDs are ideally suited for operation under cold and low outdoor temperatures, such as for outdoor winter settings, freezer rooms etc, but for fluorescent lamps, low temperatures may affect operation and cause an issue. T8 led tube lights have been developed for use in fluorescent light fixture to replace conventional fluorescent tubes, these tubes lights are identical in size to the fluorescent tube then you are replacing and can be fitted in no time. Due to these advantages, LED tube became an increasingly popular choice for office, store, school, basement, garage shopping mall, manufacturing facility, museum, exhibition hall, convention center, waiting hall, dining hall and similar lighting applications.

Benefits of T8 Led tube light:

1. T8 led tube doesn't include mercury, it is environment friendly.

Address: Haicheng Road, Baiguan Industrial District, Shangyu Area, Shaoxing City, Zhejiang province, China; Tel: +861 8267537265, **WhatsApp: +8618267537265; Email:sales@seminglighting.com**

Zhejiang Seming Electronic Co., Ltd

2. The LED tube is designed to be completely plug and play, thus it is healthier for our eyes.
3. High luminous efficiency, low power consumption, it can save 80% energy than fluorescent tubes
4. Long life span, it can last 30000 hours.
5. LED are ideally suited for operation under cold and low outdoor temperatures.
6. The CRI for LED tubes is typically higher than 80, close to the sun's value, showing colors truly and naturally.

Application :

table lamp, crystal chandelier, wall lamp, down light and so on.
