

T45 Tubular 45mm LED Filament Bulb

Product Description

T45 Tubular 45mm LED Filament Bulb is a light bulb that uses LEDs as its filaments. Light is emitted from LED filaments uniformly and evenly in all directions, instead of focusing it in a specific area in the way that many LED light bulbs do. And the LED filaments of T45 Tubular 45mm LED Filament Bulb are placed inside the glass enclosure in four sides to make sure that light is spread in all directions. A superfluous aluminum die cast for heat dissipation was no longer required.
